

Sealtite® RPC Cover

Overview

There are a variety of needs in the food packaging industry. It takes expertise and resources to learn about a problem and develop a custom solution with long-term benefits. With 85 years in the industry, Chantler Packaging Inc. has developed the Sealtite® RPC cover, an engineered flexible material that serves packers, shippers, food manufacturers, food processors, and food distributors.

1) Research & Development

a. Correct Gauge

This RPC cover is a correctly gauged. It uses less material without compromising the durability.

b. Easier to Handle

Less material means easier to handle (less weight) and easier to store.

c. Flexible

Our team works to provide the smartest solutions for RPCs. This film stays on the container with through stretchy material that wraps around the RPC corners.

d. Well Balanced Venting

The ventilation pattern allows for the right balance of sun protection and airflow for produce.

2) Environmental Scorecard

The experts at Chantler Packaging Inc. have developed the Sealtite® RPC cover use up to 50% less materials than a competitor's product. This engineered solution allows for lower greenhouse gas emissions, creating a sustainable solution for your everyday RPC cover needs. Additionally, less material means less processing and shipping for you.

3) Lowest Total Cost of Ownership

The versatility of Sealtite® allows the account management team to work with a customer and create a custom solution that benefits the **speed, package quality**, and ultimately, lowers the **total cost of ownership**. As the Sealtite® RPC covers, use less materials it also means less costs. This potentially means less storage room and less shipping costs.

4) Fast Lead-Time

This is a special engineered solution from the original creators of the RPC cover! The Sealtite® RPC cover is proudly made in Canada; leading to faster lead-time for all of our friends in Canada, U.S. and Mexico.

5) Safety

Sealtite® is approved by national health and safety organizations to package food. **The Canadian Food Inspection Agency (CFIA)** approves Sealtite® and **Health Canada** has provided letters of non-objection to the material. Additionally, it meets the U.S. **Food and Drug Administration (FDA)** requirements for direct food contact packaging.

Additionally, the facilities have proudly met **ISO 22000 & PAS 223 HACCP** food safety initiatives and is **ISO 9001** (Quality) registered. Therefore, Sealtite® has been recognized as a reputable flexible packaging solution to safely pack a variety of foods.

Technical Data

Specifications:	Metric	Imperial
Size	Fits 60 cm x 40 cm RPCs	
Film thickness	20 μ	0.8 mil
Pieces per carton	1600	1600
Packing carton size	495 x 394 x 152	19.5" x 15.5" x 6"
Carton weight (net)	13.4 kg	30 lbs
Cartons per pallet	54	54
Pallet weight (net)	724 kg	1620 lb
